EXPERIENCE

Test Automation Developer

Toronto, ON

Polar (formerly Polar Mobile)

Apr. 2013 - Aug. 2013

- Designed automated testing architecture using Buildbot to automatically run tests written in Java.
- Helped company achieve continuous deployment by through continuous integration using Buildbot, reducing release cycle time significantly.
- Developed and executed Selenium test cases in Java using the JUnit framework to thoroughly test mobile
 and web applications with multiple browsers in parallel.
- Extensively documented automated testing infrastructure for others to carry on with.

Key Technologies: Java, JUnit, Eclipse, Selenium, Bash, Buildbot.

PROJECTS

UW Food Menu

Waterloo Food Services Android App

Mar. 2013 - Present

- Designed a parser to asynchronously request and parse JSON data from the University of Waterloo API into data to be displayed in app.
- Integrated with Google Maps API to display location data and operational hours of eateries.
- Implemented Python and PHP scripts to parse API data and store in a MySQL or SQLite database.
- Used Git for version control and implemented a feature branch workflow with issue tracking.

Key Technologies: Java, Eclipse, Python, PHP, MySQL, Git.

EDUCATION

Candidate for Bachelor of Applied Science

Waterloo, ON

University of Waterloo

Sept. 2012 - Present

Relevant Projects

Android Map Navigation App

- Designed an Android application to algorithmically navigate a user past obstacles to a chosen destination using an SVG map.
- Implemented constant polling from magnetic field and gyroscope sensors to determine the user's position and orientation.
- Created a finite state machine to determine user's movements.

Awards

Faculty of Engineering Upper-Year Scholarship, University of Waterloo

June 2013

* Awarded to the top student in each class based on academic performance.

Dean's Honour List, University of Waterloo

Mar. 2013 & June 2013
